Councilman Alexander made motion to approve; Councilman Overton second.

There was much discussion.

Public Works Director Ronnie Stiles stated he has had conversations with Chief Bandy. Mr. Stiles added that he is not for this and the employees are not for this.

Mayor Brown stated this is an enforcement duty, saves money and is more efficient.

Discussion continued.

Vice Mayor Hayes requested a deferral to allow all parties to get together to discuss.

Councilman Overton withdrew his second; Councilman Alexander withdrew his motion.

Discussion continued and this item will be on the April 7th Council meeting agenda for further discussion.

4. Ordinance Appropriating Funds to Implement the 2015 Compensation Plan

Councilman Mayberry questioned when the implementation of the compensation plan would begin; immediately or on July 1. He spoke about the costs for beginning the new plan in this budget year and beginning July 1.

Mayor Brown stated delaying the implementation could have some bearing on some pending key hiring's for the City.

5. Approving New Job Description for Data Quality Control Specialist

Building Official Chuck Stuart stated the new position is a business necessity of his department that will touch many other departments. Mr. Stuart gave stats and explanations for this request. He also stated that he is not requesting any new money to fund this position but will be added in next year's budget.

Memorandum

To : Planning Commission

From : Engineering Division

Date : 3-23-2015

Subject : Smith Street Alley ROW Abandonment

The owner of properties located on 266 and 272 Smith Street has requested the City abandon any interest it may have in the old 16' alley right of way located between the properties. A paved drive is located in the right of way, and connects to the property to the north (253 W. Main St.).

No records were found of the City maintaining the alley, and most of the deed references call the alley private. The tax assessor's map shows the alley as public though. At this time, Gallatin Public Utilities, Gallatin Electric Department, Gallatin Public Works, and the Gallatin Fire Department have indicated they have no desire to keep any public interest in the alley.

Be aware there may still be a private easement in affect for the property. The City would just be abandoning any interest they may have in the alley

The abandonment request will be sent to City Council for their consideration, with any comments this body may have regarding the request.

Section 205, Flood Risk Management Study

SUMMARY:
The US Army Corps of Engineers has received funding to initiate a feasibility study on the East Camp Creek Basin, which includes Town Creek. The feasibility phase is 100% federally funded up to the first $100,000. If the project is deemed viable, the costs for design and implementation are then shared. Attached is a fact sheet and a sample letter of intent. Item will be discussed further at the meeting.

US Army Corps
of Engineers
Nashville District

CONTINUING AUTHORITIES PROGRAM
SECTION 205
FLOOD RISK MANAGEMENT

Purpose

Section 205 of the Flood Control Act of 1948 (PL 80-858), as amended, authorizes the Corps to plan, design, and construct non-structural and structural measures for flood damage reduction, also referred to as flood risk management, through a partnership with non-federal government agencies such as cities, counties, and tribes. Projects under the Section 205 authority allow the Corps to reduce flood damages experienced in a community if a cost effective solution is identified.

Process and Funding

The first step of the two step study process is the completion of a federal interest determination, or FID, which is a quick justification for moving to a more detailed feasibility level of study. The purpose of the second phase of study, or feasibility phase, is to confirm a federal interest in participating in a solution to the identified problem. The feasibility phase is 100% federally funded up to the first $100,000. Any feasibility costs that would exceed $100,000 are cost shared 50% federal, 50% non-federal and requires execution of a Feasibility Cost Sharing Agreement (FCSA).

Costs for design and implementation are cost shared 65% federal and 35% non-federal after signing a Project Partnership Agreement (PPA). Work-in-kind can be credited if included in the scope and performed after the FCSA or PPA has been signed. The federal cost limit for Section 205 projects is $7 million.

Local Responsibilities

The non-federal sponsor is responsible for acquiring all lands required for the project, more specifically, lands, easements, rights-of-way, relocations, and disposal sites (LERRDS), but this cost is credited towards their 35% share of the total project cost; a minimum of 5% cash, and for the operation, maintenance, repair, rehabilitation, and replacement once the project is completed.

Request for Assistance

Requests for assistance should be submitted in the form of a Letter of Intent from a state or local government agency. Samples are available upon request and should be mailed to the **U.S. Army Corps of Engineers, Nashville District, Attn: Chief, Planning, Programs, and Project Management Division, P.O. Box 1070, Nashville, TN 37202-1070**. After receipt of a written request, the Nashville District will contact the applicant by telephone to discuss the problem and our processes.

Dear Sir:

In accordance with the provisions of Section 205 of the Flood Control Act of 1948, as amended, the (*state, city, county, town*) is requesting the U.S. Army Corps of Engineers assistance in addressing a flooding problem at (*name and location of the flooding and the body of water causing the problem*).

We are aware of the following non-federal cost sharing requirements associated with projects undertaken under this authority.

- The Feasibility Phase is federally funded up to $100,000. Costs in excess of $100,000 are cost shared on a 50/50 basis with the local sponsor. All of the sponsors share can be in-kind services.

- The sponsor's share of implementation (design and construction) costs includes providing all lands, easements, rights-of-way, relocations, and disposal areas (LERRD's), in addition to a cash contribution of at least 5% of the total project cost. If this amount is less than 35% of the implementation cost, the sponsor is required to provide an additional cash contribution to equal 35%. The sponsor's cost share is limited to a maximum of 50% of the total cost. The federal limit for a Section 205 is $7,000,000.

- The sponsor is responsible for providing clean lands and for the operation, maintenance, repair, rehabilitation, and replacement of the project after it is completed.

We are aware that this letter serves as an expression of intent and not a contractual obligation and either party may discontinue the study process at any stage prior to construction.

Sincerely,
Name of Sponsor
